As reto shirk compliance with regulations which be expected. The Sanitary Superintendent, In ordering it is only necessary to state however, apparently intends to include European owners and architects. The jerry builder and his ways are well known, and had Mr. McCallum's remarks been confined to individuals of that class they would not Case. Per Bot. have been too strong, but as applied to prosecution, but adequate and effective Marine Magistrate to hear cases of assault where architects and the generality of owners they supervision by a reliable, responsible, well are, we are persuaded, unjustifiable. Architects as a class may indeed almost be ranked next to doctors as sanitarians. Whatever friction may have arisen in this Colony bepartment it would be fairer to attribute to subordinate officers. honest misunderstanding than to the sordid

motives attributed by Mr. McCallum. The next section of the report deals with markets and slaughter houses and the cognate subject of street hawking. The latter, Mr. McCallum says, is to some considerable extent a convenience to the poorer classes of ratepayers, and he deems it expedient to tolerate its continuance, care being taken to prevent the establishment of premanent stalls by the hawkers. As to the slaughter houses, they are, according to the Sanitary Superintendent, so inadequate that really good management is impracticable. This is a state of things which ought not to be allowed to continue, for it is impossible, from a sanitary point of view, to exaggerate the importance of keeping a careful watch on the meat supply of the Colony. Nothing is said in the report as to the condition of the bakeries, but in view of the disgusting disclosures made at Singapore on this subject it would be satisfactory to know that the Sanitary authorities of Hongkong keep an eye on these establishments, especially those un-

der exclusively native management.

On the subject of mortality statistics Mr. McCallum says that with such a populafact that most persons when they are ill the death-rate should be a remarkably low one, approximating to that of a garrison; but instead of a low there is a high death-rate, high even if the population was a normal one. For the last two years, on the appear- 8 p.m. ance of the annual statistics, we have had Overture to call attention to the alarming nature of the death-rate. This year, happily, there is Dance another tale to tell. The death rate in 1889. fell from 32.1 per thousand to 23.7. It is true that in 1888 there were 762 deaths from smallpox and choleraic complaints as against only 11 last year, but this is very causes other than smallpox and cholerate complaints were 4,548 in 1889, as against 5,233 in 1888, 5,020 in 1817, and 5,014 in these figures. He says :- " It has frequently been observed that after the abatement of such an outbreak of a virulent disease as four different nationalities; namely, Dr. Wage had assumed the character of an epidemic, the death-rate for the community in which for Great Britain. the epidemic occurred has for some time afterwards been below the average deathrate. No matter what function music may be called upon to perform, whether it be to appeal to our emotions and imagination as pure form and colour in the symphony or sonata, or to heighten and idealise the expression of poetry in the song the cantain or the lyric drams, it would be contrary to every known law of nature for it to relinquish any principle of organic structure that has been evolved from its own substance and in accordance with its own laws. This or that particular musical form may become extinct and make way for others in the general and uncessing struggle for existence, and only the fittest will survive; and what is fit to-day may be unfit to-merrow. But the great principle of musical form and organism of some sort is and, if we may trust the lesson of the set, the evolution of the future will still be one from simpler to more complex and more highly organised forms. Just he the lack of musical organism in the old Florentine stile rappresentativo was soon felt to be a weakness, and not a source of strength, in the lyric drams, so will the similar lack of musical organism in the Wagnerian music-drama be found to be a weakness, and in time, be cured by a new formal evolution of some sort. Wagner's famous dictum, that the composer in lyric drama must remember not to be too musical, will give way to You' Bulow's far truer and profounder counter-apophthegm, that a composer cannot, in any case, possibly be musical enough. A certain German critic once said that, whatever might be thought of Wagner, he was indisputably the gate through which the future path of the lyric drama lay. Yes, but the lyric drams must pass through this Watson & Co., A. S.,
